APPENDIX H

VEHICLE MILES TRAVELED (VMT) ANALYSIS FOR THE PROPOSED KPC COACHELLA SPECIFIC PLAN TECHNICAL MEMORANDUM

TECHNICAL MEMORANDUM

To:	Dr. Kali Chaudhuri KPC Development Company, LLC	Date:	December 7, 2022
From:	Keil D. Maberry, P.E., Principal Zawwar Saiyed, P.E., Associate Principal Yi Li, Transportation Engineer I Linscott, Law and Greenspan, Engineers	LLG Ref:	2.22.4560.1
Subject:	***Vehicle Miles Traveled (VMT) Analysis for the Proposed KPC Coachella Specific Plan, Coachella***		

As requested, Linscott, Law & Greenspan, Engineers (LLG) is pleased to submit this Vehicle Miles Traveled (VMT) Analysis Technical Memorandum for the proposed KPC Coachella Specific Plan project (herein after referred to as "Project") in the City of Coachella, Riverside County, California. This Technical Memorandum presents the VMT screening criteria, analysis methodology, impact thresholds, analysis, findings, and conclusions. It should be noted that the approach and methodology outlined in this Technical Memorandum are consistent with the *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020),* which provides additional detail on the language and analysis procedures described in this Technical Memorandum.

The following sections of this Technical Memorandum summarize the Project description, County of Riverside VMT screening criteria, analysis methodology, VMT impact thresholds, VMT analysis, and conclusion.

PROJECT DESCRIPTION

The Project site is generally located on the north side of the I-10 Freeway in the City of Coachella, Riverside County, California. The Project applicant is proposing a Specific Plan for the development of various mixed-uses on approximately 2,700 acres of land. The KPC Coachella Specific Plan will include a broad range of land uses including residential, commercial, entertainment, schools, parks, other public facilities, and open space. The Specific Plan will be made up of five villages, further divided into planning areas. The proposed Project consists of a mixed-use master plan with:

- 1,679 DU Single Family Detached Housing
- 3,027 DU Multifamily Housing (Low-Rise)
- 2,838 DU Multifamily Housing (Mid-Rise)
- 538 DU Senior Adult Housing – Single Family
- 1,456 DU Senior Adult Housing – Multifamily
- 2,831 Kindergarten – 12th Grade Students

- 1,399,135 SF Shopping Center (Retail)
- 466,382 SF Office
- 375 Rooms Hotel
- 100,000 SF Casino
- 10,000-Seat Live Theater
- 449.7-Acres in Public Parks

Primary access for the Project site will be provided via the proposed Avenue 50/I-10 Interchange as well as an extension of the Vista Del Norte Road from the west. The Project land uses are anticipated to be completed by Buildout Year 2045.

Figure 1 presents the vicinity map that illustrates the general location of the Project site and surrounding street system while ***Figure 2*** displays the existing site aerial of the current site layout. ***Figure 3*** presents the conceptual site plan for the Project, prepared by KPC.

PROJECT SCREENING CRITERIA

Under the VMT methodology, screening is used to determine if a project will be required to conduct a detailed VMT analysis. The following section discusses the various screening methods outlined in the *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020),* and outlines whether the Project will screen-out, either in its entirety, or partially based on individual land uses.

Small Projects Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> *"This applies to projects with low trip generation per existing CEQA exemptions or based on the County Greenhouse Gas Emissions Screening Tables, resulting in a 3,000 Metric Tons of Carbon Dioxide Equivalent (MTCO2e) per year screening level threshold. Presumed to cause a less-than-significant impact:*
>
> - *Single Family Housing projects less than or equal to 110 Dwelling Units; or*
> - *Multi Family (low rise) Housing projects less than or equal to 147 Dwelling Units; or*

- *Multi Family (mid-rise) Housing projects less than or equal to 194 Dwelling Units; or*
- *General Office Building with area less than or equal to 165,000 SF; or*
- *Retail buildings with area less than or equal to 60,000 SF; or*
- *Warehouse (unrefrigerated) buildings with area less than or equal to 208,000 SF; or*
- *General Light Industrial buildings with area less than or equal to 179,000 SF; or*
- *Project GHG emissions less than 3,000 Metric Tons of Carbon Dioxide Equivalent (MTCO2e) as determined by a methodology acceptable to the Transportation Department; or*
- *Unless specified above, project trip generation is less than 110 trips per day per the ITE Manual or other acceptable source determined by Riverside County."*

Based on the above, the proposed Project will not screen-out since it is not listed in any of the small projects' categories listed above.

Projects Near High Quality Transit Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> *"High quality transit provides a viable option for many to replace automobile trips with transit trips resulting in an overall reduction in VMT. Presumed to cause a less-than-significant impact:*
>
> - *Within a ½ mile of an existing major transit stop; and*
> - *Maintains a service internal frequency of 15 minutes or less during the morning and afternoon peak commute periods."*

Based on the above, the proposed Project will not screen-out since it is not near high quality transit.

Local-Serving Retail Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> "*The introduction of new Local-serving retail has been determined to reduce VMT by shortening trips that will occur. Presumed to cause a less-than-significant impact:*

- *No single store on site exceeds 50,000 SF; and*
- *2)Project is local-serving as determined by the Transportation Department."*

Based on the above, the proposed Project will not screen-out since it is not a Local-Serving retail project.

Affordable Housing Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> *"Lower-income residents make fewer trips on average, resulting in lower VMT overall. Presumed to cause a less-than-significant impact:*
>
> - *A high percentage of affordable housing is provided as determined by the Riverside County Planning and Transportation Departments."*

Based on the above, the proposed Project will not screen-out since it is not an affordable housing project.

Local Essential Service Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> *"As with Local-Serving Retail, the introduction of new Local Essential Service shortens non-discretionary trips by putting those goods and services closer to residents, resulting in an overall reduction in VMT. Presumed to cause a less-than-significant impact if:*
>
> - *Project is local-serving as determined by the Transportation Department; and*
> - *Local-serving and Day care center; or*
> - *Police or Fire facility; or*
> - *Medical/Dental office building under 50,000 square feet; or*
> - *Government offices (in-person services such as post office, library, and utilities); or*
> - *Local or Community Parks."*

Based on the above, the proposed Project will not screen-out since it is not a local essential service project.

Map-Based Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> *"This method eliminates the need for complex analyses, by following existing VMT data to serve as a basis for screening smaller developments. Note that screening is limited to residential and office projects. Presumed to cause a less-than-significant impact:*
>
> - *Area of development is under threshold as shown on screening map as allowed by the Transportation Department."*

Based on the above, the proposed Project will not screen-out since map-based screening is not available for the proposed Project site.

Redevelopment Projects Screening

The *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* states:

> *"Projects with lower VMT than existing on-site uses, can under limited circumstances, be presumed to have a non-significant impact. In the event this screening does not apply, projects should be analyzed as though there is no existing uses on site (project analysis cannot take credit for existing VMT). Presumed to cause a less-than-significant impact:*
>
> - *Project replaces an existing VMT-generating land use and does not result in a net overall increase in VMT. "*

Based on the above, the proposed Project will not screen-out since it is a new development project and not a redevelopment project.

Based on the above, the proposed Project will not screen-out, either in its entirety, or partially based on individual land uses, thus requiring a full VMT analysis.

VEHICLE MILES TRAVELED (VMT) ANALYSIS METHODOLOGY

As required by the *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)*, projects not screened out through the steps above should complete VMT analysis and forecasting through the RIVCOM model to determine if they have a significant VMT impact. This analysis shall include both "Project-generated VMT" and "Project's effect on VMT" estimates under the four scenarios listed below:

- Baseline Conditions

- Baseline Plus Project
- Cumulative No Project
- Cumulative Plus Project

The following section is to determine the VMT measure and threshold of significance for application to a land use project. Significance thresholds are based on land use type, broadly categorized as efficiency and net change metrics. ***Table 1*** presents the threshold basis that will be presented in this Technical Memorandum.

Table 1. Threshold Basis

Threshold Basis	Efficiency	Net Change
Example Land Use	Residential, Office, Industrial	Retail, Medical Office, Sports Venue
Measure for VMT Threshold	Per capita, per employee	Regional VMT change
Customer Component	No	Yes

Efficiency metrics include VMT/Capita and Work VMT/employee. "Net Change" refers to the net change in regional VMT and it is used for elements that include a significant customer base, such as commercial uses.

Based on the above, a VMT analysis for the proposed Project was conducted utilizing RIVCOM to determine the County of Riverside average and Project's residential VMT, office VMT and retail VMT, and the County of Riverside, and the following:

- VMT per Capita
- VMT per Employee
- Regional VMT Change

It should be noted that according to ***Appendix E*** as contained in the *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)*, it can be presumed that a land development project will not have a significant impact under Cumulative conditions if it is not determined to have one under Baseline conditions unless there are known circumstances, as determined by Transportation Department, that might alter this outcome. Unless specifically required by the Transportation Department, Project analysis for Cumulative conditions is only required if there is a finding of a significant impact under the Baseline Plus Project conditions.

Additionally, for Specific Plans and Community Plans, Riverside County requires that Cumulative analysis be completed irrespective of the findings of the Baseline

Plus Project conditions. Further, No Project and Plus Project conditions under both the Baseline and Cumulative must provide total Regional VMT values. Note that the Regional VMT values are for informational purposes and are not used as the basis for the determination of a significant impact.

VEHICLE MILES TRAVELED (VMT) IMPACT THRESHOLDS

As previously discussed, a project that does not meet the screening criteria will require the preparation of a detailed transportation analysis. The project VMT will be evaluated in order to determine if the project is expected to cause a significant transportation impact. The VMT significance criteria as stated in the *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* is detailed below:

The County adopted the county-wide average VMT as the threshold of significance. The thresholds of significance are summarized in ***Table 2***.

Table 2. VMT Threshold of Significance

Land Use	Threshold of Significance
Residential	Existing county-wide average VMT per capita
Office	Existing county-wide average VMT per employee
Retail	Net increase in total VMT

Please note a project would result in a significant project-generated VMT impact if its VMT exceeds the VMT threshold based on its respective land use.

VEHICLE MILES TRAVELED (VMT) ANALYSIS

Summarized in the section below are the average VMT per Capita, VMT per Employee and Regional boundary VMT values utilizing RIVCOM for the County of Riverside and the proposed Project. It should be noted that the Project is located in multiple Traffic Analysis Zones (TAZs) and they are combined as such. Project development totals were converted into Socio-Economic Data (SED) and inputted into RIVCOM. ***Figure 4*** presents the RIVCOM TAZ Map for the proposed Project.

1) Residential Land Uses

The proposed Project is anticipated to have 9,538 DU and utilizing the clustering algorithm for RIVCOM SED, the population factors of 3.45 for the Year 2018 and 2.84 for the Year 2045 are utilized, as presented below:

Residential Factors & Population	
Land Use	Residential
Size	9,538 DU
Population Factor (Baseline)	3.45 Population/DU
Population (Baseline)	**32,913**
Population Factor (Cumulative)	2.84 Population/DU
Population (Cumulative**)**	**27,127**

Baseline Project-Generated VMT – As shown below, the proposed Project average baseline Project-generated VMT per Capita is 16.74% less than the County of Riverside baseline VMT per Capita threshold:

Baseline Project-Generated VMT per Capita	
Baseline County of Riverside VMT/Capita (Threshold)	14.88
Project Baseline Residential VMT	407,839
Project Baseline Population	32,913
Baseline Project-Generated VMT/Capita	12.39
Compared to the County of Riverside Threshold	**16.74% Lower**

Cumulative Project-Generated VMT – As shown below, the proposed Project average cumulative Project-generated VMT per Capita is ***8.54%*** less than the County of Riverside cumulative VMT per Capita threshold:

Cumulative Project-Generated VMT per Capita	
Cumulative County of Riverside VMT/Capita (Threshold)	15.89
Project Cumulative Residential VMT	394,246
Project Cumulative Population	27,127
Cumulative Project-Generated VMT/Capita	14.53
Compared to the County of Riverside Threshold	**8.54% Lower**

Based on the criteria outlined in this report, the proposed Project's residential land uses will not exceed the County of Riverside baseline or cumulative VMT per Capita threshold and thus will not have a significant VMT impact for neither the baseline nor cumulative conditions for the residential land uses.

2) Office Land Uses

The proposed Project is anticipated to have 5,948 employees by utilizing the *County of Riverside General Plan Appendix E-2: Socioeconomic Build-out Assumptions and Methodology* as presented below:

Employee Factors[1] & Employees	
Land Use	Office
Agriculture	0.05 Employee/Acre
Commercial Retail	500 SF/Employee
Commercial Office	300 SF/Employee
Open Space – Mineral Resources	0.03 Employee/Acre
Open Space - Recreation	0.15 Employee/Acre

Baseline Project-Generated VMT – As shown below, the proposed Project average baseline Project-generated VMT per Employee will need to be reduced by ***5.41%*** to meet the County of Riverside baseline VMT per Employee threshold:

Baseline Project-Generated VMT per Employee	
Baseline County of Riverside VMT/Employee (Threshold)	18.30
Project Baseline Work VMT	115,056
Project Baseline Employees	5,948
Baseline Project-Generated VMT/Employee	19.34
Compared to the County of Riverside Threshold	**5.41% Reduction Needed**

Cumulative Project-Generated VMT – As shown below, the proposed Project average cumulative Project-generated VMT per Employee will need to be reduced by ***3.69%*** to meet the County of Riverside cumulative VMT per Employee threshold:

[1] County of Riverside General Plan Appendix E-2: Socioeconomic Build-out Assumptions and Methodology.

Cumulative Project-Generated VMT per Employee	
Cumulative County of Riverside VMT/Employee (Threshold)	17.31
Project Cumulative Work VMT	106,927
Project Cumulative Employee	5,948
Cumulative Project-Generated VMT/Employee	17.98
Compared to the County of Riverside Threshold	**3.69% Reduction Needed**

Based on the criteria outlined in this report, the proposed Project's office land uses will exceed the County of Riverside baseline and cumulative VMT per Employee threshold and thus will have a significant VMT impact for both the baseline and cumulative conditions for the office land uses.

3) Retail Land Uses

As described in the above section, the retail land use SED was coded into RIVCOM.

Baseline Project's Effect on VMT – As shown below, the baseline Plus Project link-level boundary County-wide VMT will need to be reduced by ***0.87%*** to meet the baseline no Project link-level boundary County-wide VMT threshold:

Baseline Project's Effect on VMT	
Baseline No Project link-level boundary County-wide VMT (Threshold)	60,874,265
Baseline Plus Project link-level boundary County-wide VMT	61,408,606
Compared to the County of Riverside Threshold	**0.87% Reduction Needed**

Cumulative Project's Effect on VMT – As shown below, the cumulative Plus Project link-level boundary County-wide VMT is ***0.18%*** less than the cumulative no Project link-level boundary County-wide VMT threshold:

Cumulative Project-Generated VMT	
Cumulative No Project link-level boundary County-wide VMT (Threshold)	84,233,703
Cumulative Plus Project link-level boundary County-wide VMT	84,079,221
Compared to the County of Riverside Threshold	**0.18% Lower**

Based on the criteria outlined in this report, the proposed Project's retail land uses will increase the baseline link-level boundary County VMT under the plus Project

condition compared to the no Project condition and thus will have a significant VMT impact for the baseline conditions for the retail land uses.

Further, based on the criteria outlined in this report, the proposed Project's retail land uses will decrease the cumulative link-level boundary County VMT under the plus Project condition compared to the no Project condition and thus will not have a significant VMT impact for the cumulative conditions for the retail land uses.

It should be noted that a significant majority of the retail development will be local-serving retail and restaurant uses with building sizes less than 50,000 SF, which would screen out under County and OPR Guidelines but in order to be conservative, VMT mitigation measures will be identified to reduce the significant baseline retail VMT impact to less than significant.

VMT MITIGATION MEASURES

When project VMT exceeds the threshold(s) of significance, the project will need to mitigate its CEQA transportation impact. The type and size of the project will determine the most appropriate mitigation strategies for VMT impacts. For large projects such as general plans or specific plans, VMT mitigations should concentrate on the project's density and land use mix, site design, regional policies, and availability of transit, bicycle, and pedestrian facilities. For smaller projects such as an individual development project, VMT mitigations will typically require the preparation of a TDM program. A TDM program is a combination of strategies to reduce VMT. The program is created by an applicant for their land use project based on a list of strategies agreed to with City of Coachella staff.

As referenced in the *OPR Technical Advisory*, the California Air Pollution Control Officers Association's *Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity, Designed for Local Government, Communities, and Project Developers* Report, Chapters 3 - Transportation, December 2021, (CAPCOA Report) quantifies the reduction in vehicle miles traveled (VMT) associated with a particular mitigation measure. The CAPCOA VMT reduction strategies include built environment changes and transportation demand management (TDM) actions.

The Transportation Demand Management (TDM) strategies are sub-categorized into the following:

1) Land Use

2) Trip Reduction Program

3) Parking or Road Pricing/Management

4) Neighborhood Design

5) Transit

6) Clean Vehicles and Fuels

It may be noted that there are rules and combined maximums for calculating the VMT reduction when applying multiple mitigation measures. To safeguard the accuracy and reliability of the methods while maintaining their case of use, the following rules should be followed when considering reductions achieved by transportation measures.

Combining Measures Across Scales

According to the CAPCOA, there are sixteen (16) quantified measures at the Project/Site scale that can be combined with each other and seventeen (17) quantified measures at the Plan/Community scale that can be combined with each other. *The GHG reductions of transportation measures from different scales of application should never be combined*.

Combining Measures Within a Subsector

Effectiveness levels for multiple measures within a subsector may be multiplied to determine a combined effectiveness level. The CAPCOA recommends that measures reductions within a subsector be multiplied. This will take the following form:

$$Reduction_{subsector} = 1 - [(1 - A) * (1 - B) * (1 - C)]$$

Where A, B, and C are the individual measures reduction percentages for the measures to be combined in each subsector. In addition, each subsector has a maximum allowable reduction.

Combining Measures Across Subsectors

The CAPCOA report adopts 70 percent as a maximum for the combined VMT impact from the following four subsectors: Land Use, Neighborhood Design, Parking or Road Pricing/Management, and Transit:

$$Reduction_{multi-subsector} = 1\text{-}\ [(1 - Land) * (1 - Design) * (1 - Parking) * (1 - Transit) \leq 70\%$$

Please note that this multi-subsector maximum purposefully excludes the Trip Reduction Program subsector.

Table 3 presents the CAPCOA TDM strategies that quantify potential VMT reductions by implementing each approach. It should be noted that not all TDM strategies will be applicable to the Project. The first column indicates the CAPCOA

Report section that discusses the methodology for quantifying the VMT reduction associated with the corresponding measure. A measure's maximum effectiveness in VMT reduction is indicated in the last column. One or a combination of these mitigation measures could be utilized to offset the impact, fully or partially.

Recommended Mitigation Measures

The recommended mitigation measures for the proposed Project's office land use consists of:

- T-7. Implement Commute Trip Reduction Marketing
- T-8. Providing Ridesharing Program

T-7. Implement Commute Trip Reduction Marketing

This measure will implement a marketing strategy to promote the project site employer's Commute Trip Reduction (CTR) program. Information sharing and marketing promote and educate employees about their travel choices to the employment location beyond driving such as carpooling, taking transit, walking, and biking, thereby reducing VMT and GHG emissions.

Utilizing the CAPCOA T-7 formula as shown below:

$$A = B * C * D$$

Where A is the percent reduction in VMT emissions from the project/site employee commute VMT; B is the percent of employees eligible for the program; C is the percent reduction in employee commute vehicle trips, with the value of "-4%"; and D is the adjustment from vehicle trips to VMT, with the value of "1".

Since 100% of employees will be eligible for the program, the Project can get a maximum VMT reduction of up to ***4.00%.***

T-8. Provide Ridesharing Program

This measure will implement a ridesharing program and establish a permanent transportation management association with funding requirements for employees. Ridesharing encourages carpooled vehicle trips in place of single-occupied vehicle trips, thereby reducing the number of trips, VMT and GHG emissions.

Utilizing the CAPCOA T-8 formula as below:

$$A = B * C$$

Where A is the percent reduction in VMT emissions from the project/site employee commute VMT; B is the percent of employees eligible for the program; and C is the percent reduction in employee commute VMT, with the value of "-4%".

Since 100% of employees will be eligible for the program, the Project can get a maximum VMT reduction of up to ***4.00%.***

Based on the above, after the Project implements the combination mitigation measures of T-7 and T-8, the VMT reduction is:

$$1 - [(1 - 4\%) * (1 - 4\%)] = \mathbf{7.84}\%$$

It should be noted that the above recommended mitigations measures will completely offset the Project's baseline and cumulative VMT impacts for the office and retail land uses as detailed above.

CONCLUSION

Based on the *County of Riverside Transportation Analysis Guidelines for Level of Service, Vehicle Miles Traveled (Dated December 2020)* and the VMT methodology, criteria, analysis, thresholds and results outlined in this Technical Memorandum, the proposed Project will not have a significant VMT impact after implementing the recommended VMT mitigation measures outlined in this memorandum.
